

We recommend that you not use the Finder to move any installed games or demos downloaded using the MacGameStore app. If you do, the MacGameStore app may have difficulty locating the game or demo when you try to play it.

If you wish to delete games or demos downloaded through the MacGameStore app, please do so using the app. Start the MacGameStore app, locate the installed game or demo, and use the "Remove" option (found in the drop-down menu on the Action button in the same row as the game or demo).
